```

Rearrange/reorder a data table by some value

We will use the function `arrange()`

```
surveys_arranged <- arrange(surveys, weight)
```

```
tail(surveys_arranged, 100)
```

```

Filter data

To filter unwanted data or by some specific value in our data we use the function `filter()`

```
filter(surveys, species_id == "DS")
```

```
##      record_id month day year plot_id species_id sex hindfoot_length weight
## 1           11    7  16 1977      5         DS   F           53      NA
